Cristina Denia

ABOUT ME

i'm a junior business data analyst, committed and results-oriented, with skills in transforming complex data into valuable insights for strategic decision-making.

I have experience in Power BI, SQL and Python, where I developed effective analytics and visualizations. I am dedicated to continuous learning through certified courses in data analytics and visualization, and am eager to contribute to the team's success while growing professionally.

- French: A2 level.
- Valencian: C1 level.

EXPERIENCE

Business Process Analyst - NTT DATA S.L

March 2024 - Currently

- Develop comprehensive reports in Power BI from scratch, beginning with data reception from various sources, including Excel, Access, and databases, ensuring seamless integration (utilizing advanced SQL for queries and transformations).
- Leverage Power Query for data transformation and cleansing, applying advanced techniques in M and DAX to enhance accuracy and utility.
- Write Python scripts to generate tables and optimize data processing steps in Power Query, increasing efficiency and streamlining workflows.
- Model data efficiently to enhance performance and clarity of reports.
- Design visually impactful and coherent reports based on storytelling principles, incorporating graphs, filters, and other visual elements.

Tools Used: Power BI, DAX, Power Query, SQL, Python.

Internship Data Analyst - NTT DATA S.L

March 2023 - February 2024

EDUCATION

Universidad Miguel Hernández

University Degree in Business Administration and Management | Currently enrolled
